

Smart Plug
Quick Start Guide

Introduction

The Smart Plug monitors the energy usage of connected appliances. It allows you to turn these devices on and off remotely as well as setting on/off schedules from the mobile app.

Get to know your device

Buttons

On/off buttons	Used to switch the socket ON and OFF
Reset Button	Return the device to default factory settings Set the device in pairing mode so as to pair with a wireless switch

LED Flashing	The device has not joined a network
Green LED solid on	The load is ON
RED LED solid on	The load is OFF
LED flashing three times	Entering pairing mode or return to the default factory settings

Get Started

To get started, you will need:

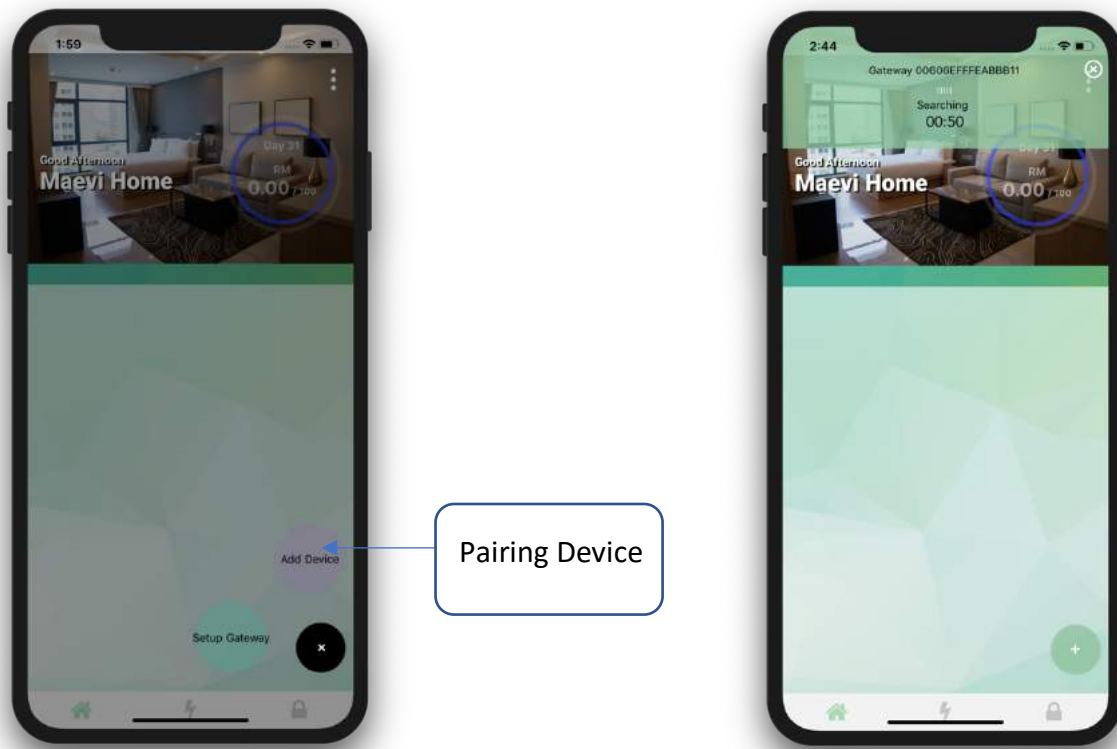

- Smart gateway
- Smart plug
- Mobile App

Then follow the steps below:

1. Insert the Smart Plug into socket and the LED indicator will turn red or begin flashing green.

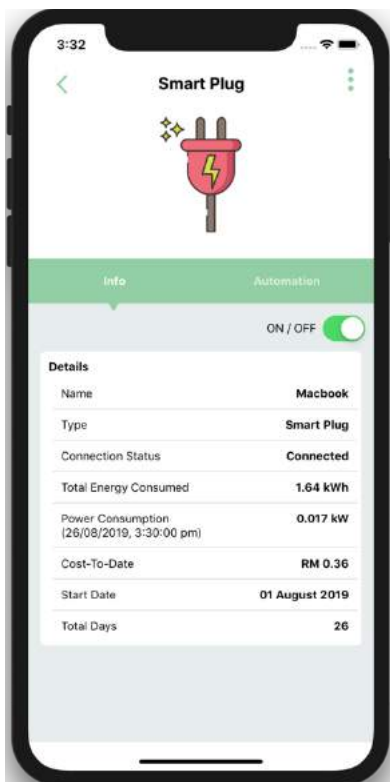

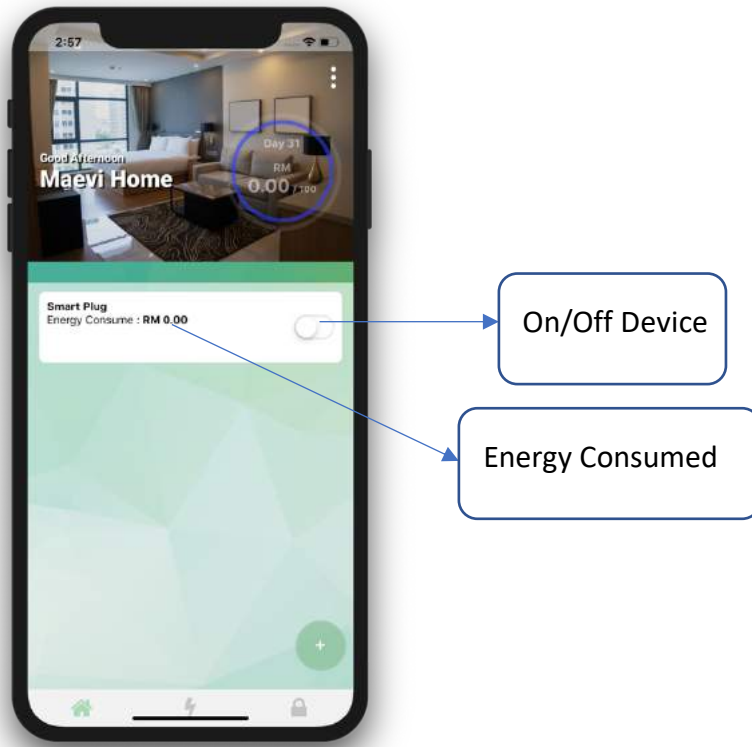

Tip: If the LED indicator is not flashing, please press and hold the reset button for 10 second to return to default factory settings until the LED indicator flashes twice.

2. Open Maevi (Maevi Smart Home) app and go to “Home Automation” tab. Press the plus circle button at the bottom right of the screen and click the “Add Device” to pair the Smart Plug with the screen to pair the Smart plug with the Gateway.

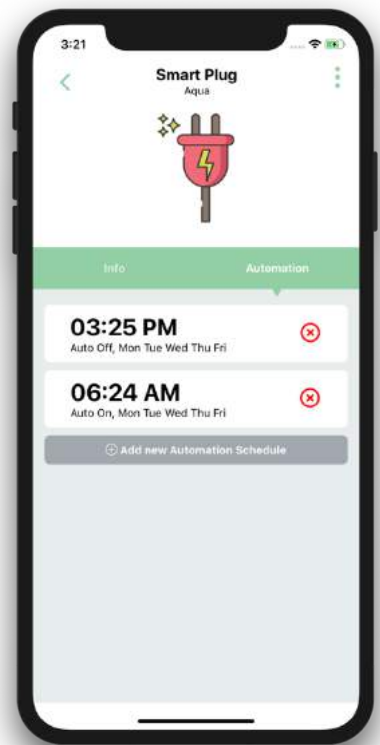

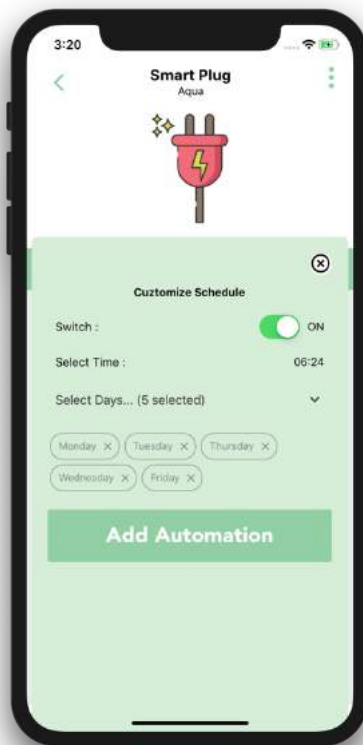

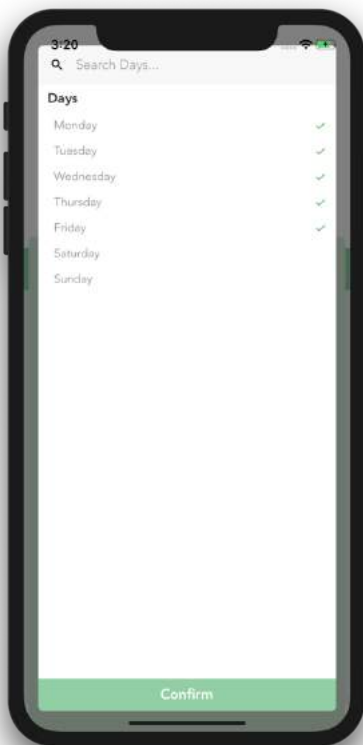

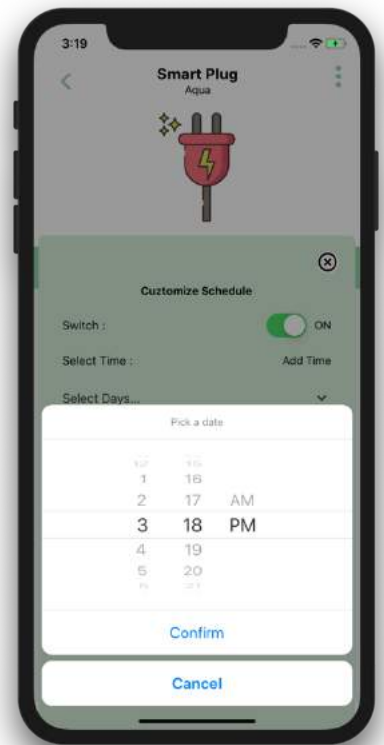

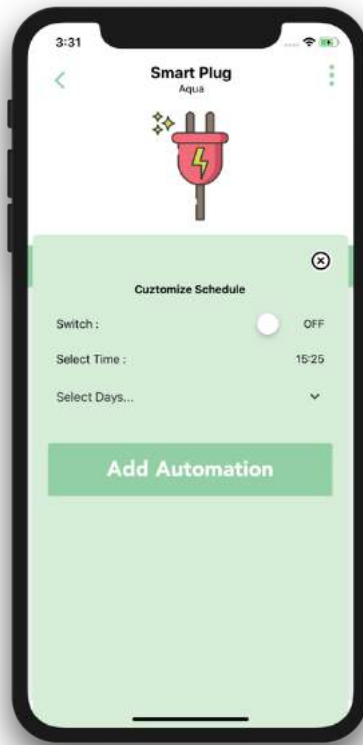

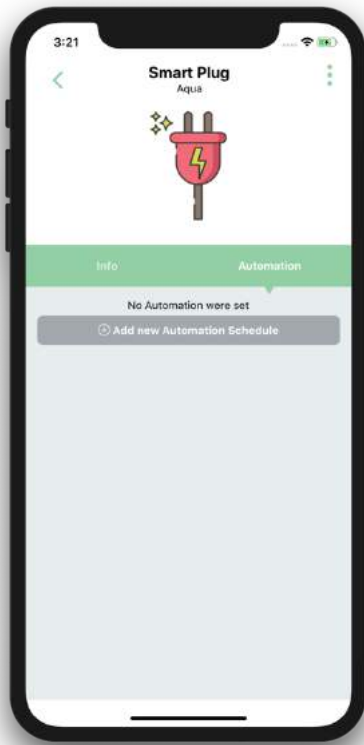

Tip: For this step, you could also press “Z” button on the Gateway for 2 seconds until the LED indicator turns blue.

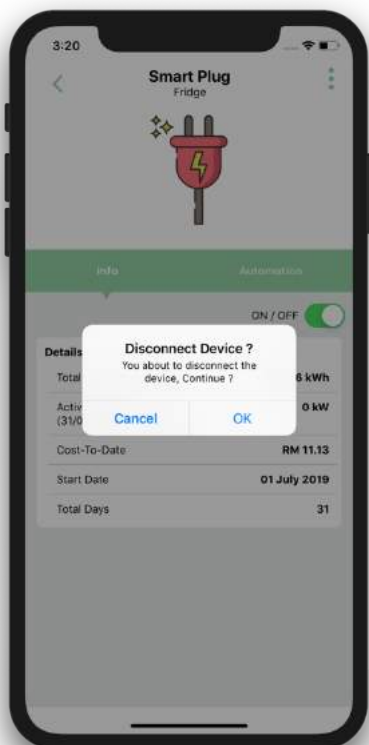

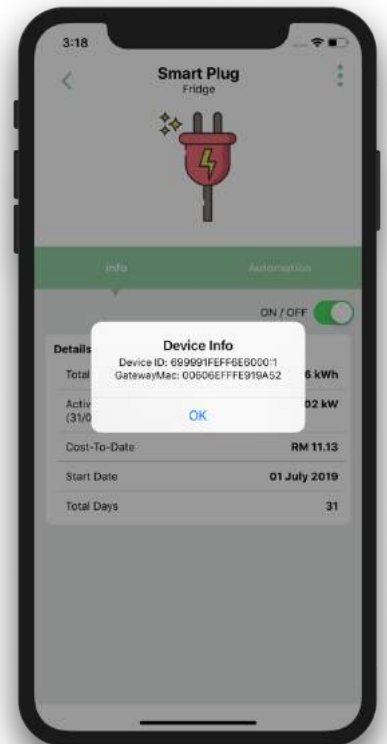

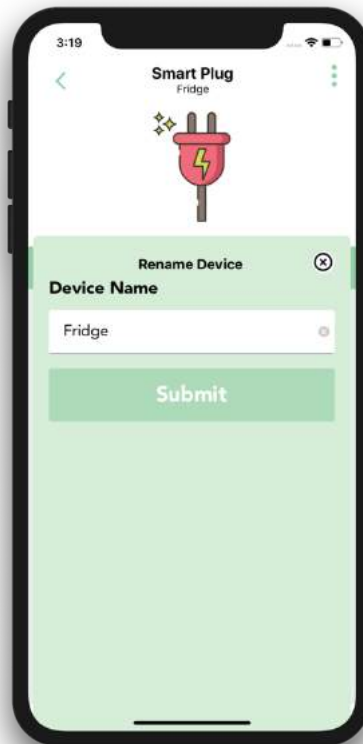

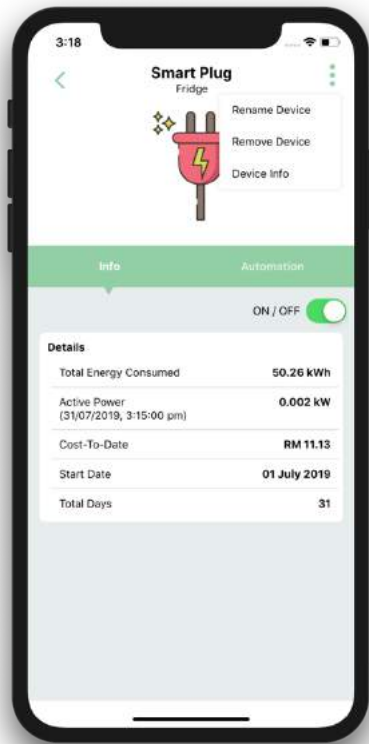

- The Smart plug will be added into the Gateway; the LED indicator will turned on solid when pairing is successful. Please check the app to see if it is added into the system.

4. Create schedule to turn On/Off the Appliances.

5. Rename Devices, Remove Device and Device Info

6. Connect the appliance which you want to monitor into the Smart Plug.

Resetting the smart plug

Use a pin key tool to press and hold the reset button for ten seconds until the LED indicator flashes a twice.
