Product Installation

The Outdoor IP Camera can be mounted on any flat surfaces.

Note: Please pair the camera prior to installation.

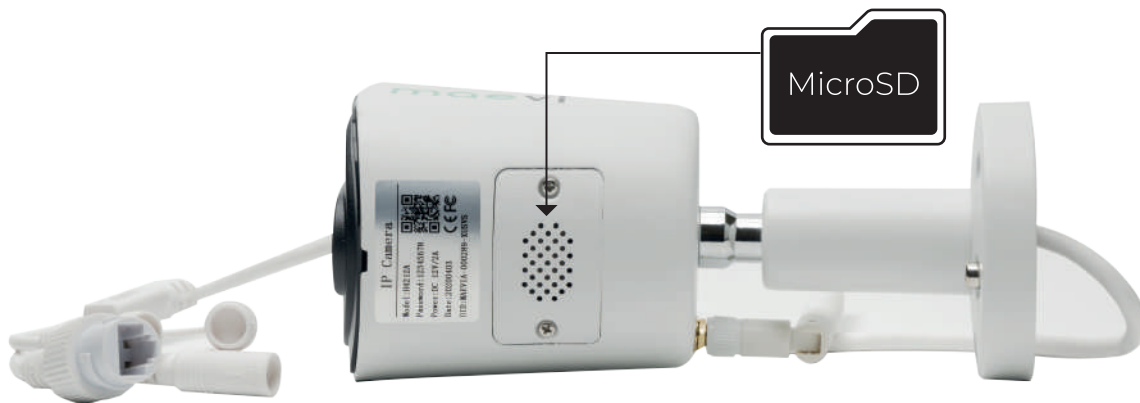

Set Up Guide

- **Turning the Device On**

Connect the power cable into the power connector. Plug in the power supply to the socket. The Outdoor IP Camera will automatically turn on once the power supply is on.

- **Installing a Micro SD Card**

Make sure the power is turned off before inserting or removing the Micro SD card. Remove the cover shown below using a screwdriver and insert the Micro SD card into its (the side with metal contact points goes in first). Re-install the cover when it is done.

NOTE: Please use a genuine Micro SD card by qualified manufacturers and make sure that the storage capacity is 64GB or less, with a reading/writing speed of no less than U1/Class 10.

- **Restore Factory Settings (Reset)**

Press and hold the Reset button for 10 – 15 seconds to restore your device to factory settings. Data stored in the Micro SD card is not erased.

Getting Started

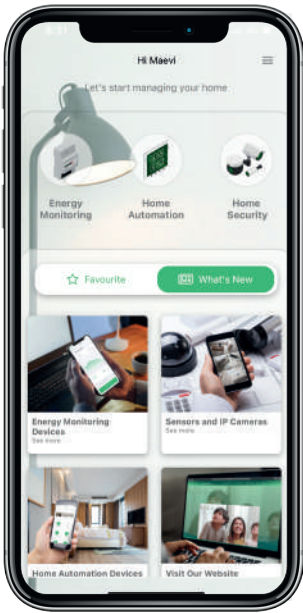

To get started you will need :

- Maevi IP Camera.
- Maevi Home App
(Available for download on Google Play Store and Apple App Store).

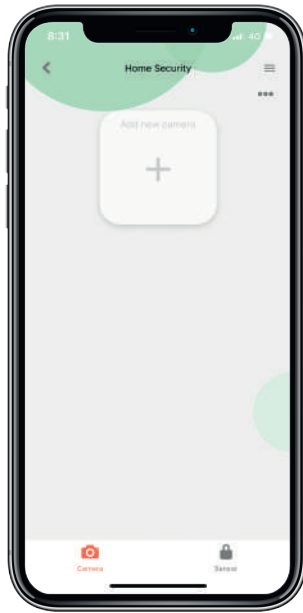

Then follow the steps below:

1. The IP Camera will automatically turn on once the power cable is connected to it.
2. Open Maevi (Maevi Home) app and go to “Home Security” tab. Tap the Add Camera button on the screen to start the configuration.

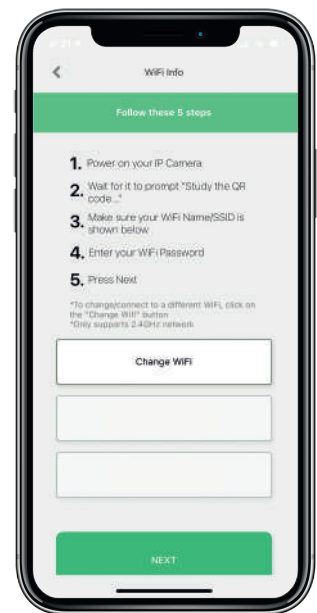

IP Camera Configuration Guide -WiFi
